SUMMARY

Full-stack engineer with experience at XpertBot and CompuSoft, and AI & distributed systems training at Eurisko. Specializes in Laravel, React, Next.js, and Node.js, with hands-on AI integration experience. Built a production RAG pipeline with FAISS vector search and a Qwen2.5 LLM for a school management system. Experienced with MySQL and MongoDB databases, Redis caching, Laravel Sanctum authentication, role-based access control, real-time features (SSE), offline-first mobile architecture, and security testing (OWASP ZAP, Burp Suite). Comfortable working across web, mobile, and AI layers.

EXPERIENCE

Software Engineer — Eurisko (Internship)

Aug 24 – Sep 25, 2026 | On-site | Adma, Keserwan-Jbeil Governorate, Lebanon | Focus: Systems Design and Artificial Intelligence (AI)

- Designed and built the Internal Operations Service Hub, an internal ticketing platform for employees to submit and track requests to internal teams, replacing ad-hoc WhatsApp/Slack/email requests.
- Worked across the full lifecycle: system architecture and data modeling, request lifecycle management (claims, status transitions), full-stack development, AI integration, and cloud deployment.

Software Engineer — CompuSoft

Jul 2026 – Aug 2026 | Full-time | Remote, Lebanon

- Contributed to a large-scale ERP platform spanning POS, Accounting, Inventory, and other business modules.
- Developed and maintained features across the frontend, backend, and database layers using PHP, JavaScript, Bootstrap, and SQL.

Software Engineering Trainee — AI & Distributed Systems — Eurisko

Sep 2025 – Oct 2025 | Hybrid | Certificate awarded Jan 2026

- Designed distributed architectures for high-traffic systems: follower graphs, inventory drops, and real-time notifications.
- Built and deployed RAG pipelines using open-source LLMs and FAISS vector search with structured prompt engineering.
- Developed a production-style full-stack MVP with real-time order tracking (SSE) and cloud deployment best practices.

Full-Stack Software Engineering Intern — XpertBot Academy

Oct 2024 – Apr 2025 | Remote

- Built Epic Toy Store, a full-stack e-commerce platform with a Laravel REST API, Flutter mobile app (users), and a Laravel Blade web store (admin + customers).
- Implemented Redis caching for product listings and user data, API rate limiting, Google OAuth login, and password reset via Mailtrap.
- Built an admin analytics dashboard showing revenue, expenses, best-selling items, and monthly revenue charts with date-range filtering (Chart.js).
- Conducted automated browser testing (Selenium) and vulnerability assessments (OWASP ZAP, Burp Suite) with AWS EC2 hardening.
- Managed Agile workflows via Azure DevOps and Jira.

PROJECTS

EduGate — AI-Powered School Management System

React · Next.js · Node.js · Laravel · Python · FAISS · Hugging Face · MySQL

- Built a full RAG chatbot with a 3-layer hybrid intent classifier and FAISS vector search over school policy documents; ran a 4-bit quantized Qwen2.5-3B-Instruct via FastAPI, cutting VRAM usage from ~12GB to ~2GB.
- Role-based access (student/parent/teacher/admin) enforced via Laravel Sanctum. AI assistant designed and built by Joseph Chamoun; backend/frontend co-developed with Maria Wadih.

Kfarhawra Brotherhood Platform — Live Production App

React · TypeScript · Next.js · Node.js · Laravel · TanStack Query · Dexie.js · InstantDB · Sanctum

- Role-based member management system for a real Lebanese community organization (20–30 active users), used daily for events, finances, moneyboxes, meetings, and elections.

Epic Toy Store — E-Commerce Platform

Laravel · Node.js · Flutter · MySQL · Redis · Google OAuth · Sanctum · Selenium · OWASP ZAP

- Full-stack e-commerce platform with a web admin dashboard (revenue, expenses, best-sellers, monthly charts) and a Flutter mobile app; added Redis caching, Google OAuth, and Sanctum auth.

SKILLS

Languages: Python, JavaScript, TypeScript, PHP, Java, C#, Dart, Kotlin

Frameworks: Laravel, React, Next.js, Node.js, Flutter, Kotlin (Android)

AI / ML: FAISS, Hugging Face Transformers, Sentence Transformers, RAG Pipelines, BitsAndBytes

Databases: MySQL, MongoDB, Redis, SQLite, Firebase Realtime DB, InstantDB

Auth & APIs: Laravel Sanctum, Google OAuth, RESTful APIs, SSE

DevOps & Tools: Git, GitHub, AWS EC2, Azure DevOps, JIRA, Postman, Vercel, Render | **Testing:** Selenium, OWASP ZAP, Burp Suite

Concepts: RBAC, Offline-First Arch., Delta Sync, Agile, Prompt Engineering | **Soft Skills:** Leadership, Problem-Solving, Team Collaboration, Public Speaking

EDUCATION

Bachelor of Computer Science — American University of Technology

Graduation: 2026 | Lebanon

CERTIFICATIONS

- Eurisko: AI Systems & Full-Stack Engineering Training (Jan 2026) · AI Full Lifecycle for Developers (Oct 2025) | XpertBot: Flutter & Git · Laravel & Git · Data Science · Project Management · Cyber Security · QA
- Semicolon Academy: Cybersecurity Workshop (Jan 2026) · Lebanese Universities CTF Competition (Jun 2025) | Maxwell Leadership: Public Speaking & Interview Skills
